
Compatibility list of GoodWe inverters and IoT products

Version 07
May 30th, 2025

This document lists the compatibility between all GoodWe inverters and IoT products consisting of

1.Communication Modules 2.Data loggers and communication boxes 3.Smart Meters

Communication Module

Communication module integrates the function of local configuration and data transmitting to cloud center, so that customers can monitor inverter ’s working status locally or remotely.

Model	Status	ARM Platform	Communication Modules													Firmware Version Requirement (No remark means no version requirement)
			WIFI BOX	WIFI KIT	WiFi KIT -20	4G KIT-EC	4G KIT-AU	4G KIT-AF	BLUETOOTH KIT	LAN BOX	LAN KIT	WIFI/LAN KIT	WIFI/LAN Kit-20	WIFI/LAN Kit-20 (Cyber Security Version)	Ezlink3000

Smart Meter

Smart Meter can detect power import and export status to achieve functions of power limitation, battery charging and discharging management, etc.

Note: If using HK1000 for load monitoring, please do not connect the RS485 cable between the inverter and meter.

Data Logger and communication box

Data Logger supports to connect multiple inverters by RS485 mainly for C&I system, and PLC(HPLC) for utility system, achieving functions of data monitoring and system control. Moreover, adding smart meter can realize the function of power limitation.
