

Global Project Profile

Since 2014 Sunman has installed
over **50MW** of eArc globally

eArc is the world's first glassless solar module. This new generation of lightweight, thin and flexible modules are an innovation combining proven crystalline silicon solar cells with Sunman's patented composite material. This composite material has the durability and robustness of glass, without any of the weight.

eArc is the go-to solar solution for roofs that cannot bear the load or uplift associated with glass panels.

Sunman Global Project Profile

Location	Switzerland
Year Completed	2020
System Capacity	500 kWp
Solar Panel	SMF300M-6X10DW
Installed Method	Quick Bonding

Location	China
Year Completed	2018
System Capacity	522 kWp
Solar Panel	SMA320P-6X12DW
Installed Method	Conventional Mounting

Location	UAE
Year Completed	2019
System Capacity	273 kWp
Solar Panel	SMF325M-6X12DW
Installed Method	Quick Bonding

Location	Australia
Year Completed	2019
System Capacity	235 kWp
Solar Panel	SMD290M-6X10
Installed Method	Quick Bonding
